

Memento elliptic 2023

The crystals are composed of each other as in a fabric from which crystals and drops hang as if they were suspended in the air. A new conception of crystal chandelier, in which the structure is completely hidden giving a sensation of total lightness. The light comes out of the texture of gems in a homogeneous way, embellishing the lamp.

Details

Each lamp is a unique piece, handcrafted by expert Italian artisans who certify the authenticity of Made in Italy every day.

Colors

chromed iron structure
transparent crystal
